Logon. 620 range.

Logon.

Logon is an excellent choice for companies that equally value a sense of openness, lightness and dynamism, as well as premium quality and enduring style. Logon represents high quality, perfectly crafted design – whether as a single table or table system.

The especially lightweight look of the Logon tables is the result of a sophisticated design principle, borrowed from aircraft construction. The foot section and table top bearers are firmly braced with one another with threaded rods in the uprights. As a result, minimum material thicknesses achieve particularly high levels of strength.

Whether round or with corners, long or short – there is virtually no limit to the shapes Logon can produce. The modular structure of the table frames enable depths of 75 – 130 cm (29 1/2" – 51 1/8") and widths of up to 300 cm (118 1/8") per table segment. 45° and 90° angles are standard elements, intermediate sizes can be produced to order by Wilkhahn. The table tops, with their characteristic impact-resilient profile integrated into the lipping, are available in laminated or veneered versions. Versatile room usage is achieved, particularly when combined with Confair and Timetable ranges of matching, portable, collapsible or swivel tables.

Wilkhahn

Function
Standalone tables for offices and systems components for permanently linked table configurations in conference rooms, ideal in combination with Confair folding tables in conference spaces that can be partitioned in different ways.

Frame
Die-cast aluminium foot section, bright chrome-plated, polished or coated or coated based on the Wilkhahn woodstain colour samples. Aluminium profile upright, clear anodised or coated, coated in black where foot sections are bright chrome-plated.
Die-cast aluminium profile core, depending on the foot section with a silver satin finish or coated black. Uprights optionally available as bright chrome-plated versions. Aluminium profile underframe, depending on the foot section with a silver satin finish or coated black. Table depths 75-90 cm with a centre underframe, table depths 100-130 cm with two underframes. Polyamide glides in black. Lockable black polyamide castors.
Model 621/35: Steel profile underframes, depending on the base with a silver satin finish or coated black. Polyamide glides in black.

Core material of table top
Plywood with bullnose or straight wood lipping all the way round with integrated, impact-resilient profile in black elastomer or straight plastic lipping all the way round. In the case of system elements: straight joining edge without a profile.

Table top group 1 – laminate
Table top thickness 26 mm

Variant 1
Laminate (single colour) based on Wilkhahn's colour and surface samples with wood lipping, natural oiled finish. Wood decor laminate on request.

Variant 2
Soft matt laminate from the Wilkhahn colour and surface samples with wood lipping in natural oiled finish or colour matched with the plastic lipping. Anti-reflective, soft-touch surface with anti-fingerprint characteristics.

Table top group 2 – veneer
Table top thickness 26 mm

Variant 1
Beech, oak or ash veneer (exception: no ash with a natural finish on chamfered lipping) based on the from Wilkhahn woodstain colour samples with wood lipping, colour-matched as far as possible with the veneer.

Variant 2
Maple (exception: no maple with a natural finish in the case of chamfered lipping), walnut or elm veneer from the Wilkhahn woodstain colour samples with wood lipping colour-matched as far as possible with the veneer.

Veneer types
As a standard, the veneer panels are slip-matched.
Surfaces sealed with clear lacquer:
open-pore: oak, ash, walnut and elm veneer
closed-pore: maple and beech veneer.
Some specific growth features possible.

Modesty panels
Ribbed aluminium extruded profile clear anodised or coated black. Clear anodised screws connected to the table top. Modesty panels can also be retrofitted.
Standards
The Logon tables comply with the ANSI/BIFMA X 5.5 standard.

When placing repeat orders, please indicate whether your table tops have slip-matched or book-matched veneer.

Edge profiles
Standard version: Bullnose double with integral, impact-resilient profile

Alternatively: Straight with integral, impact-resilient profile

Straight plastic lipping

Wilkhahn

Table top groups

Laminate, veneer type 1 or 2, soft matt laminate, you can find further surfaces in our media center.

Laminate. The material is made by bonding cellulose and décor paper layers, as well as resin, by applying heat and pressure. This produces an extremely tough surface that comes in a variety of different colours. Laminate is highly recommended for areas where the tables are subject to a lot of wear and tear because they are frequently moved around for example.

Wood veneers. Natural wood is a living material: in the way it looks and changes over the years. Sometimes more significantly and sometimes more subtly, depending on the type of wood and how light it is. If a more consistent look is preferred, stained surfaces or industrially produced veneer are available.

Uprights

Bright chrome-plated aluminium, clear anodised or coated in black or with a silver satin finish

Foot sections

Bright chrome-plated, polished aluminium or coated based on Wilkhahn samples

Table top bearers, underframes

Aluminium coated black or in a silver satin finish

You can find our current fabric collection in our media center.

The digital sample colours differ from the originals.

A material-efficient, timeless and recyclable table

Logon's sophisticated frame design isn't just attractive, but also means fewer materials are required for its manufacture. The slender cross-sections also reduce the weight and the energy consumed to transport the product. Designed as a directly linkable table system, just one foot section is required to connect table sections. The timeless design, top-quality materials, perfect craftsmanship and screw-fitted structure, plus the ease with which all the components can be repaired and dismantled, guarantee the table will last and be used for a long period of time.

- Frames comprise aluminium that combines high dimensional stability with perfect surface finish and durability. At the end of a product life cycle, aluminium is 100% recyclable without any quality loss and with low energy consumption. The tension rods in the uprights are in steel, 20% of which consists of recycled material and is, in turn, also 100% recyclable. The height-adjustable glides are in high-perfor-mance plastic that is designed with a view to maximum service life.

- The system table top in high-quality, E1 grade particle board with solid wood lipping is also 100% recyclable. Natural materials such as laminates and real wood veneers are used to finish table tops. Veneered tops are protected with low-solvent, water-based lacquer. The integral, impactresilient profile in polypropylene protects edges and helps prevent damage.

- All frame elements and table tops are screw-fitted; this means that table tops can, for example, be disassembled and refurbished or renewed in the case of signs of wear and tear.

The Logon table system, launched in 1996, doesn't just comply with Wilkhahn's guidelines for ecologically responsible product design, the design- and material-concept as well as the sizes of the table systems coordinate precisely with the sizes of the mobile Confair folding table. If a conference room can be partitioned in various ways, combining the two ranges allows enhanced used of the space available, paying dividends in both financial and environmental terms and helping to improve an office building's ecological footprint.
